

Abhi B C

Full-Stack Software Engineer

Moodbidri, Karnataka, India

+91-8217025255 | abhbc.work@gmail.com | [linkedin.com/in/abhbc2005](https://www.linkedin.com/in/abhbc2005) | github.com/codewithabhi101 | abh13protfolio.netlify.app

Summary

Full-stack software engineer who has independently designed and shipped five web and mobile applications end-to-end, owning frontend, backend, databases, APIs, and deployment from idea to production. Built AI-powered features such as automated duplicate detection, and is comfortable leveraging AI coding tools without depending on them. Proficient across Next.js, React Native, Java/Spring Boot, Node.js/Express, PostgreSQL, MySQL, and MongoDB, with hands-on experience in system design, API architecture, and authentication (JWT, OAuth 2.0). Actively seeking Software Engineering / Full-Stack Development internship opportunities.

Technical Skills

Languages: JavaScript, TypeScript, Java, SQL, HTML, CSS

Frameworks & Libraries: React, React Native, Next.js, Node.js, Express.js, Spring Boot, Expo, Zustand

Databases: PostgreSQL, MySQL, MongoDB, SQLite, IndexedDB (Dexie.js)

Backend & APIs: REST APIs, GraphQL (Hasura), Spring Security, JWT Auth, OAuth 2.0

Tools & Platforms: Git, GitHub, Docker, Docker Compose, CI/CD, Maven, Vercel, Netlify, Render, EAS Build

Concepts: System Design, Offline-First Architecture, Component-Based Architecture, Responsive Design

Projects

Local-First Notes App | *React Native, Expo, TypeScript, SQLite, Node.js/Express*

[Live](#)

- Built a cross-platform (iOS/Android/Web) offline-first notes app using React Native, Expo, and TypeScript, with a platform-specific data layer backed by SQLite on native and IndexedDB on web.
- Designed a custom sync engine with offline change queueing and conflict resolution, added client-side AES encryption, and deployed a Node.js/Express backend to Render with CI/CD via Netlify.

AI Agent Workflow Builder | *Next.js, TypeScript, Hasura GraphQL, PostgreSQL, Nhost*

[Live](#)

- Structured a 7-table multi-tenant schema (organizations, workflows, steps, triggers, runs) in PostgreSQL and modeled all relationships in Hasura GraphQL Engine on Nhost.
- Implemented Hasura row-level permission policies across 3 roles (owner/editor/viewer), validated against seeded multi-org test data, and authored a technical design document for step-level authorization and resumable workflow execution.

SubTracker | *Next.js, TypeScript, Node.js, Express.js, MongoDB*

[Live](#)

- Engineered a full-stack SaaS with a Next.js frontend and a Node.js/Express REST API backed by MongoDB, deployed and publicly accessible on Vercel.
- Integrated JWT authentication with protected middleware, category-wise spend analytics, and AI-powered detection of duplicate or unused subscriptions.

FeatureHub | *Java, Spring Boot, MySQL, Next.js, React Native*

[Live](#)

- Developed a full-stack feedback and roadmap platform with a Java 17/Spring Boot 3 REST API, MySQL database with Flyway migrations, and JWT authentication via Spring Security, serving both a Next.js web app and a React Native (Expo) mobile app.
- Automated real-time duplicate detection on feature requests, atomic-constraint-backed voting, and a 4-stage roadmap lifecycle (Under Review, Planned, In Progress, Completed); containerized the full stack with Docker Compose and set up 2 CI pipelines for backend and frontend validation.

Education

AIET, Mijar – Moodbidri

B.E. in Information Science & Engineering

2023 – Present

CGPA: 7.5

Shubhodaya PU College

PUC

2021 – 2023

66%

Shubhodaya English School

SSLC

2020 – 2021

81%

Certifications

Node.js & MongoDB: Developing Back-end Database Applications — *IBM, Coursera* | [View Certificate](#)

Programming with JavaScript — *Meta, Coursera* | [View Certificate](#)

Achievements

Maintains an active GitHub portfolio of 29 public repositories, including 5 production-grade full-stack applications with live deployments

Earned IBM and Meta certifications on Coursera covering Node.js, MongoDB, and JavaScript

Languages

English • Kannada • Hindi
