SUMMARY

Information Science & Engineering student (3rd year) specializing in **Next.js and TypeScript** for building responsive, scalable web applications. Comfortable with modern frontend workflows, component-based UI development, and project deployment. Regularly practicing DSA to strengthen problem-solving skills. Seeking an internship/entry-level role in Frontend / Full-Stack (Next.js) development.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript
- **Frontend:** React.js, Next.js, HTML5, CSS3
- **Computer Science Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming
- **Tools & Platforms:** Git, GitHub, VS Code, Netlify
- **Soft Skills:** Problem Solving, Communication, Team Collaboration

PROJECTS

Portfolio Website (Next.js + TypeScript)

[Live](#)

- Designed and developed a fully responsive personal portfolio to showcase projects, skills, and contact information.
- Built reusable components and implemented modern UI design principles using Next.js.
- Optimized performance and deployed the application on Netlify.

Lorenta Technologies Website (UI Practice Project)

[LINK](#)

- Recreated and practiced professional website layouts using Next.js and TypeScript.
- Focused on component-based architecture, responsive design, and clean code structure.
- Improved understanding of real-world website UI patterns and navigation systems.

Agriculture College Demo Website (Next.js + TypeScript)

[LINK](#)

- Developed a responsive demo website for an agriculture college showcasing courses, admissions, programs, and campus information.
- Built reusable components using Next.js and TypeScript for scalable and maintainable architecture.
- Implemented structured routing, hero sections, and informational pages with clean UI design.
- Deployed the project on Netlify for public access and performance optimization.

CERTIFICATIONS

- Web Development Using Tools (Next.js ,Typescript,React.js)
- Introduction to Programming Using HTML and CSS

ACHIEVEMENTS

- Regular DSA practice and coding problem-solving
- Built multiple self-driven and collaborative projects; active on GitHub
